

## **Voice Mobility adds Service Provider Expertise**

*Agreement with VCS Incorporated will increase focus on Service Provider Space*

**VANCOUVER, BC, CANADA – June 6, 2007** - Voice Mobility International, Inc. (TSX: VMY, OTCBB: VMII and FWB: VMY), a Vancouver based developer and provider of carrier grade enhanced messaging solutions reinforced its commitment to address the service provider market by teaming with VCS Incorporated. VCS today supports and manages service provider customers on legacy central office based messaging systems

VCS, a private company with commitment to customer service excellence, today provides support to Voice Mail clients around the globe. VCS is headquartered in San Jose California and since their inception have specialized in providing unique messaging solutions to their clients.

“I see a large demand for an Open Software Messaging solution in the Service Provider market,” said Albie Vazquez President of VCS. “There is a great opportunity to replace legacy Octel service provider systems. The emergence of IP is forcing carriers to review their legacy messaging systems. The Voice Mobility messaging solution is a scalable, multi site, multi integration solution capable of replacing legacy messaging systems and providing new, unified communications functionality.”

“The demand for service provider messaging solutions is increasing as legacy messaging systems require replacement and communication systems are migrating to IP Telephony solutions. VCS is a trusted provider of Service Provider solutions”, said Randy Buchamer, CEO of Voice Mobility. “We are very happy to add VCS as a strategic distribution channel of Voice Mobility messaging solutions.”

VCS will add Voice Mobility’s UCN 250 and 1000 messaging solution to their suite of products and services.

For more information on how to purchase Voice Mobility solutions from VCS Inc, please contact its sales team at 408-499-4722 or [www.vcsincorporated.com](http://www.vcsincorporated.com)

### About Voice Mobility

Designed for enterprises and telecommunication service providers in the wireline, wireless and broadband markets, the Voice Mobility UCN solution provides highly scalable VoiceMail, Unified Messaging, Fax Services, Interactive Voice Response, and Auto-Attendant applications, as well as unique features like: Find Me/Follow Me, Spoken WebFeeds, and Voice SMS. Telecommunications providers can lower administrative and capital costs without disrupting current revenue streams and achieve incremental revenue growth by providing both new and enhanced service offerings that complement their current marketing mix.
